

Quality, environmental and energy policy

The company policy is instruction on quality, responsible use of energy, environmental protection and compliance with all occupational safety requirements for all employees at Kunststofftechnik Krug GmbH, Krug Meerane GmbH & Co. KG, Krug Hungary Kft. and Formenbau Krug GmbH.

We commit ourselves to quality, environmental protection and responsible use of energy and other resources.

We commit ourselves to the fulfillment of applicable legal, relevant, binding and other obligations in our context.

We are committed to continuously improving our management systems to improve our quality, environmental and energy performance.

We support the procurement of energy-efficient products and services as well as design-related activities that take into account the improvement of energy-related performance.

We commit ourselves to ensuring the availability of information and resources needed to achieve quality, environmental and energy goals.

The focus is on improving customer satisfaction.

We undertake to respond to any form of discrimination, corruption or ethical misconduct within the context of applicable laws and regulations and to ensure that it is respected in our entrepreneurial activities. We respect, support and respect compliance with internationally recognized human rights.

We commit ourselves to the implementation of the company policy to the following goals.

- To satisfy our customers at any time,
- Environmental awareness and environmental protection in planning and production,
- On-time, cost and quality fulfillment of our orders,
- Continuous improvement of quality and environmental protection,
- Responsible handling of resources.

The company policy is made public on the homepage.

Breidenbach, 23.09.21
